

How to Select a Monitor

1 Select a technology

Analog

- a simple, continuous sound transmission at a fixed frequency
 - available in Simple Sound™ and Ultra Clear™ models

Digital

- a clear secure connection that offers privacy and virtually eliminates static and interference
 - available in Secure Coverage™, Direct Connect™, and True Focus™ models

2 Select the number of parent units

- option of one or two parent units
 - allows each parent to have a receiver
- can leave one in the bedroom and use the other around the house

3 Select the appropriate range

Our monitors come in the following ranges

- **Analog:** 500 ft, 600 ft
- **Digital:** 2000 ft
- **Digital Video:** 1000 ft

4 Select added features

 **Nightlight:** illuminates for late night check-ins

 **Vibration:** includes vibration alert, similar to cell phones

 **Sound lights:** for visual connection to baby

 **Temperature:** displays baby's room temperature

 **Talk to Baby:** allows you to reassure baby remotely

 **LCD User Interface:** puts the control right at your fingertips

Belt clip: gives active parents wear it with you convenience

5 Look for helpful alerts

- **Low battery alert:** reminds you to charge the parent unit or replace the batteries in the child unit
- **Out of range alert:** ensures that you won't lose your connection to baby
