Nuestro personal le proporcionará toda la ayuda que necesite.
Your premium playset is manufactured from wood which has many natural characteristics and blemishes that may be present in some of the pieces in your playset. These natural characteristics may include knots or minor cracks/splits. All individual parts have been cut to provide a smooth and safe surface. All parts have been inspected to assure we pack only the safest, most durable wood product. Any minor blemishes in your playset will not affect the strength, durability, or structural integrity of the finished product. Our limited warranty does not cover the imperfections not resulting in structural failure.

- BEFORE YOU BEGIN -

First...
- Check with your homeowner’s association before assembling.
- Read instructions thoroughly before you begin. If you have purchased accessories to accompany this play set, please read all installation instructions before beginning assembly of this structure.

Check All Parts
- If a part is missing, circle the part in question and call.

Important
- In a drawing, a dotted line represents a part hidden from view (like a part under a panel).

Adult Assistance required
- Assistance is necessary to handle, fit, and secure some components.

Squareness is very Important!
Start with a level surface and keep 90° corners and 90° perpendiculars throughout the assembly to ensure all components fit together.

Safety!
- Check for protruding screws and bolts, verify all screw and bolt lengths during assembly.

Always wear OSHA-APPROVED safety glasses throughout assembly process.

- NOTICE -

This playset product is not intended for public use. It is intended for residential application and is not warranted for public or commercial use.
(This page intentionally left blank.)
Wear safety glasses during drilling, assembly of your playset.

Children should not be allowed in the playset assembly and build area.

Note the hole orientation on parts to avoid having to take parts apart later.

Some steps require the assistance of two people to ensure proper assembly, safety during assembly, as well as preventing any damage to the playset.

All hex bolts and lag screws require a lock washer or lock nut.

To properly install lock nuts, two to three threads must protrude past the lock nut and be exposed once tightened.

Acorn nuts provide protection in case screw threads protrude past a surface. Extra acorn nuts are provided for this reason. Please be certain to use these acorn nuts in the event this condition arises.

If a bolt does not engage in a T-Nut, it may be necessary to first install without the washers and “grab” the T-Nut. Then back-out the bolt and install with specified washers.

Due to wood characteristics and the manufacturing process hex bolts may protrude past a surface. If this condition occurs add additional supplied washers to eliminate bolt protrusion.

To aid in proper assembly pound T-nuts into their respective hole prior to assembly

Pound in T-nuts while the part is on the ground to ensure proper seating.

Use a soft material under parts when pounding in T-nuts to ensure no scratching or de-facing of parts.

Make sure all fasteners used are as specified. Using a fastener not specified in a particular application may result in too much thread exposure or not enough thread engagement.
SAFETY WARNINGS

Please read carefully. Observing the following statements and warnings reduces the likelihood of serious or fatal injury.

☐ This playset is recommended for children (3) through (11) years of age.

☐ Adult supervision is required for children of all ages.

☐ Dress children appropriately. Avoid loose fitting clothes, coats, scarves, drawstrings and other articles of clothing that may get caught in the swing set.

☐ Instruct children to use equipment sensibly.

☐ Children should not twist rope or chains.

☐ Children should avoid swinging empty seats.

☐ Children should sit in the center of the seat, with their full weight on the seat. Never allow children to stand or kneel on a swing.

☐ Only one child per swing at a time.

☐ Children should not get off moving equipment.

☐ Children should not walk close to, in front of, behind, or between moving items.

☐ Children should not walk or run up slide.

☐ Children should not pick up ramps or slides as this may cause breakage.

☐ Our equipment should not be installed or erected on any hard surface such as asphalt, concrete or packed earth. A fall onto a hard surface can result in serious injury to the equipment user.

☐ Place the equipment on level ground not less than six (6) feet from any obstructions.

☐ Do not use the equipment until fully erected, bolts tightened, and structure is anchored to the ground.

☐ Children should not play on the playset when it is wet. Slippery surfaces may cause a hazard.

☐ Verify that suspended climbing ropes, chains, or cables are secured at both ends and cannot be looped back on itself.

☐ Do not loop chains or ropes over their top supports so as not to reduce the strength of these ropes and chains.

☐ Instruct children not to attach items to the playground equipment such as, but not limited to, jump ropes, clothesline, pet leashes, cables and chain as they may cause a strangulation hazard.

☐ Instruct children to not use this playset or any part of it for any other purpose than its intended use.

☐ For safety do not cut ends of ropes as this may cause an unraveling condition. Instead, tie knots in end of remaining rope keeping ends intact and sealed.

NOTICE:
This playset product is not intended for public use. It is intended for residential application and is not warranted for public or commercial use.

These statements are in accordance with the Consumer Safety Standards Guide.
MAINTENANCE

Periodic maintenance is required to ensure safe enjoyment of your playset and accessories.

- Activity on your playset and optional accessories may loosen fasteners. Check all lock nuts, hex and lag bolts, quick clips, retainer rings, acorn nuts, wood screws and swing hangers for tightness and tighten as required. T-nuts should be inspected for full and proper seating into the wood. Check and tighten all fasteners twice monthly during the usage season. It is particularly important that this procedure be followed at the beginning and end of each season.

- Checking and surface cracking are characteristics of all wooden playsets. This is caused by seasonal varying temperatures and moisture conditions. To minimize this checking and/or cracking you may coat your playset with a sealant or preservative.

- The color of your playset is from a process called MicroShade™ and involves adding colorant into the wood as it is pressure treated. It means colorant is throughout the wood which helps minimize any surface marking being visible. The appearance of your playset with MicroShade will last about two years with no stain or water sealant application. You may wish to apply a water sealant which will benefit the wood and help minimize splitting and checking.

- If the stakes that anchor the set down become loose, detach them, drive them into the ground in a different area and screw them to the set again.

- All hardware is plated to prevent premature rusting. Although they are plated, some may eventually experience surface rust. This will not affect their strength.

- Oil all metallic moving parts monthly during the usage period. To eliminate squeaks, spray with WD-40 or other household lubricant.

- Check swing seats, ropes, cables, and chains monthly during usage season for evidence of deterioration.

- Check rope on all accessories for extensive wear.

- To help prevent pre-mature deterioration of rope and accessories, detach and store during the off season.

- Instruct your children not to twist ropes or chains, since this may reduce the strength of the rope or chain.

- Tents, Sandbox Cover, Trapeze, Tire, Swings and Slides should be removed and stored indoors once temperature turns 10°F. or lower. Extended exposure to these temperatures can shorten the life of your swing sets components.

- When you are ready to dispose of your playset, make sure that all metal, plastic and wood components are disposed of in accordance with local waste ordinances.
X3. CONSUMER INFORMATION SHEET FOR PLAYGROUND SURFACING MATERIALS.  

X3.1 The U.S. Consumer Product Safety Commission (CPSC) estimates that about 100,000 playground equipment related injuries resulting from falls to the ground surface are treated annually in U.S. hospital emergency rooms. Injuries involving this hazard pattern tend to be among the most serious of all playground injuries, and have the potential to be fatal, particularly when the injury is to the head. The surface under and around playground equipment can be a major factor in determining the injury-causing potential of a fall. It is self evident that a fall onto a shock absorbing surface is less likely to cause a serious injury than a fall onto a hard surface. Playground equipment should never be placed on hard surfaces such as concrete or asphalt and while grass may appear to be acceptable it may quickly turn to hard packed earth in areas of high traffic. Shredded bark mulch, woodchips, fine sand or fine gravel are considered to be acceptable shock absorbing surfaces when installed and maintained at a sufficient depth under and around playground equipment.

X3.2 Table X3.1 lists the maximum height from which a child would not be expected to sustain a life-threatening head injury in a fall onto four different loose-fill surfacing materials if they are installed and maintained at depths of 6, 9, and 12 in.

<table>
<thead>
<tr>
<th>Type of Material</th>
<th>6 in. depth</th>
<th>9 in. depth</th>
<th>12 in. depth</th>
</tr>
</thead>
<tbody>
<tr>
<td>Double Shredded Bark Mulch</td>
<td>6</td>
<td>10</td>
<td>11</td>
</tr>
<tr>
<td>Wood Chips</td>
<td>6</td>
<td>7</td>
<td>12</td>
</tr>
<tr>
<td>Fine Sand</td>
<td>5</td>
<td>5</td>
<td>9</td>
</tr>
<tr>
<td>Fine Gravel</td>
<td>6</td>
<td>7</td>
<td>10</td>
</tr>
</tbody>
</table>

However, it should be recognized that all injuries due to falls cannot be prevented no matter what surfacing material is used.

X3.3 It is recommended that a shock absorbing material should extend a minimum of 6 ft in all directions from the perimeter of stationary equipment such as climbers and slides. However, because children may deliberately jump from a moving swing, the shock absorbing material should extend in the front and rear of a swing a minimum distance of 2 times the height of the pivot point measured from a point directly beneath the pivot on the supporting structure.

X3.4 This information is intended to assist in comparing the relative shock-absorbing properties of various materials. No particular material is recommended over another. However, each material is only effective when properly maintained. Materials should be checked periodically and replenished to maintain correct depth as determined necessary for your equipment. The choice of a material depends on the type and height of the playground equipment the availability of the material in your area, and its cost.

This information has been extracted from the CPSC publications Playground Surfacing—Technical Information Guide” and “Handbook for Public Playground Safety.” Copies of these reports can be obtained by sending a postcard to the: Office of Public Affairs, U.S Consumer Product Safety Commission, Washington, D.C., 20207 or call the toll-free hotline: 1-800-638-2772
*Hint -
Throughout this manual references made to the **Left Side**, the **Right Side** and the **Front** of the playset serve as a consistent reminder to help with assembly:

Use only specific sand approved for use in sandboxes (Playsand, etc.).

Sandbox requires 550 lbs. of sand for 4 inch deep coverage and 800 lbs. of sand for 6 inch deep coverage.

We recommend (and sell) Sandbox Covers.

Keep sandbox covered when not in use to avoid contamination due to animals.

To avoid hazardous conditions, make sure Sandbox Cover is secured at all times to wooden frame.

Remove Sandbox Cover completely when using Sandbox and store away from children.

Maintain Sandbox in good condition to avoid hazardous conditions.

If Sandbox becomes damaged, repair immediately.

Inspect your Sandbox and Sandbox Cover regularly. Parts which become loose or worn should be tightened or replaced to prevent possible safety hazards.

Re-tighten all screws and fasteners at the beginning of each season.

Never leave small children unattended.

Not recommended for children under 2 years of age.
Backyard Play Systems warrants the following:
1. Every product is warranted from defects in workmanship and manufacturing for a period of one year.
2. All hardware and non-wood components are warranted for three years. Except rope which is warranted for one year.
3. Treated wood is warranted for the lifetime of your product. Backyard Play Systems will replace treated wood which becomes structurally unfit due solely to damage caused by fungal decay or termites.
4. Woodguard TM is warranted for ten years.

Backyard Play Systems will repair, replace or pay for the affected part at our discretion. In no event shall Backyard Play Systems pay the cost of labor or installation or any other costs related thereto.

Non-residential use of the system is prohibited and will void this warranty as the system is designed for residential use only.

Conditions
The warranty is effective only when:
1. The unit has been erected in accordance with the assembly instructions.
2. The unit has been regularly and properly maintained and inspected.
3. The failure occurs when the unit is owned by the original purchaser.
4. This warranty is non-transferable
5. Backyard Play Systems has received a copy of your original proof of purchase with any claims in writing.
6. Backyard Play Systems has had reasonable opportunity during the sixty (60) days following the receipt of notification to inspect and verify the failure prior to commencement of any repair work.

Wooden components may have imperfections such as checks and knots. These are natural blemishes and imperfections which are inherent to wood. The imperfections not resulting in structural failure are not covered under this warranty.

Requirements
To validate your warranty it is necessary fill out and mail in the enclosed warranty card. And also to maintain and inspect your playset regularly. Regularly is defined as once per start and end of season.

Claim Procedure
To make a claim under this warranty, you can either call 1-866-890-2211 or prepare a letter. Please have ready the information below when you call or include the information in writing:

1. The model and size of the product.
2. A list of the part(s) for which the claim is made.
3. Proof of purchase of the Backyard Play Systems item, as shown on the original invoice.
4. Run Code, as listed on the enclosed warranty card.

Mail the above information to:
Backyard Play Systems
Attn: Customer Service

November through March M-F 8 a.m. to 5 p.m. EST

No warranty is offered on the following: (1) equipment subject to abuse, negligence, improper installation, vandalism, acts of God, unauthorized alteration or attachment to equipment other than our own: or (2) equipment subjected to improper use, service or repair by customer or any third party.

To the maximum extent permitted by law, this warranty and the remedies set forth herein are exclusive and expressly in lieu of all other warranties, expressed or implied, including warranties of merchantability or fitness for a particular purpose. If Backyard Play Systems cannot disclaim or exclude implied warranties under applicable law, then to the extent possible any claims under any such implied warranties shall expire on expiration of the applicable warranty period. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may or may not apply to you. Backyard Play Systems does not assume, or authorize any person to assume for us, any other liability in connection with the sale of our products.

To the maximum extent of the law, Backyard Play Systems assumes no responsibility for incidental or consequential damages which may arise from the purchase or use of our playset or equipment. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

If any provision of this limited warranty is invalid, void or unenforceable in any instance or respect, the unenforceable provision will be severed and reformed to effect the intent of this limited warranty to the maximum extent possible, and the remaining provisions shall continue in full force and effect and shall be enforced to the full extent permitted by law.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

- WARRANTY TERMS MAY VARY OUTSIDE THE U.S.A.
- This manual is your warranty certificate. Please retain your original proof of purchase and this manual for any warranty claims.
